Factory-Trained Experts for Any Project

Our service technicians are highly skilled, and factory trained, ranging in a wide variety of technical specialties. We have experience with both installation of commercial boilers and HVAC equipment, as well as commercial plumbing applications for both new and retrofit installations. Our talented workforce has completed projects of all sizes, large and small.

- Licensed Pipefitters, Plumbers, Welders, HVAC Techs and Electricians on staff
- Our prefabrication shop is certified with R, U, and PP stamps for pressure vessels, piping systems, repairs, and turnkey fabrication.

All Major Brands Serviced

Fraser Engineering's service department is capable of performing maintenance, installation, and startup on all major brands.

Customized Maintenance Plans

Fraser Engineering's service department also offers maintenance agreements that are specifically tailored for your facility. We believe preventative maintenance and planned repairs is more cost-effective over time and helps negate abrupt system failures. We help plan for a better future and take pride in the service we provide.
